**Note 1:** The ARPA Direct Municipal Aid Estimate is based on the US House Committee on Oversight projection as of March 8, 2021, and includes the bill's distribution to "Metropolitan Cities," generally the CDBG Entitlement communities, plus a per capita aid distribution to all other cities and towns.

**Note 2:** The ARPA provides direct per capita aid to all county governments of \$65.1 billion nationally and \$1.336 billion to Massachusetts counties, with a specific provision that if a county government does not exist then that county's aid is distributed to the cities and towns in that county on a per capita basis (the per capita rate of \$193.94 is found by dividing total state population by total MA county aid).

**Note 3:** These are estimates based on information provided by the U.S. Congress and the text of the new law - final distribution amounts will be determined by the U.S. Department of Treasury, which will also be issuing guidance on the allowable uses of the funds, including addressing certain economic impacts of the pandemic, lost tax revenue, premium pay, and water, sewer or broadband infrastructure.
